KEY - S=Superior (Our best Seal Grip recommendation) VG=Very Good A=Acceptable NR=Not Recommended

*Not recommended for use in high-humidity areas. "Superior" indicates our best recommended Seal Grip products and are excellent choices for the substrates indicated. If a Seal Grip primer is not "Superior" for a given application, it is because another PPG specialty primer is more appropriate for that application. For example, PERMA-CRETE® 4-603 is ideal for masonry, concrete or stucco. For all products, please refer to the technical data bulletin for more detailed application information and limitations of use.
